AUTUMN 2015

PRODUCT NEWS AND INFORMATIONS

DEAR CUSTOMERS AND INTERESTED PARTIES,

In the last newsletter we presented our new Vacbox to you which was greeted with great interest and enthusiasm by our customers.

We are very glad that many interested persons accepted the invitation to look closely at the machine during our company event in May. Our developers and technicians were there and showed them all the advantages of our Vacbox and answered all questions. This was an unique opportunity to convince themselves of the high quality of our products. In case you missed our event, please do not hesitate, contact our sales manager, Mr. Michael Wipperfürth. He would gladly inform you about the advantages of the Vacbox and present our further product portfolio.

Our strong team is working hard on constant modernizations and improvements to keep you, at the latest technical level. Our latest development is the **DataManager**, which we present in this Autumn edition. Get ready for Industry 4.0 – we are happy to support you!

Stay interested, we are looking forward to hearing from you.

Kind regards

Ingrid Wipperfürth
(Managing Director)

**OPTIMIZE YOUR PROCESS MANAGEMENT –
WITH OUR NEW WEB APPLICATION SQL BASED SOFTWARE**

Data Manager SOFTWARE SOLUTION

CONTROL YOUR PROCESS

It's the Management system for automated recording and centralized administration of data for batteries and test results.

Generating reports and export data for production, statistic, research and sales.

The Data**Manager** is a web application SQL based software. It can be installed and programmed that all data can be viewed and transferred to an external data storage. Reports can be displayed on laptops, tablet's or smart phones

Centralized data storage, with access to local database in various locations is possible.

4.0 – THE VISION

Machines, systems, sub-processes and products share independently each other with information that trigger reactions, Mutual control is possible.

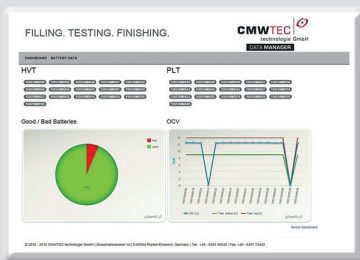

The result is a totally new understanding of production: Intelligent goods and resources are always identifiable and locatable, clearly in real time. They know their own production history, their status and planned and all alternative paths to the final situation.

ADVANTAGES AND ATTRIBUTES

- Quick status report during actual production
- Product traceability with test status
- Clear assignment of the battery test results
- Generating individual reports
- Expandable on multiple machines
- Centralized data storage
- Web application allow access with mobile devices

DASHBOARD

With current test information's for the operator while automatic mode running

GENERATING

- Reports
- Graphs
- Charts

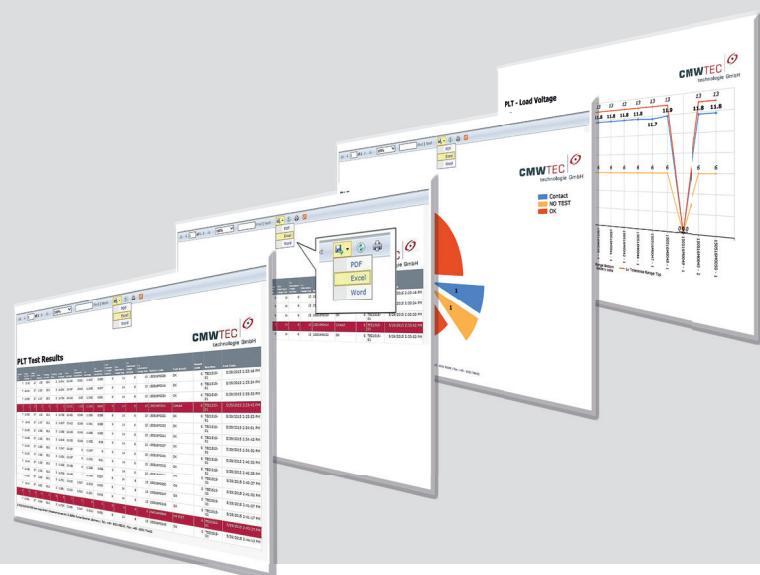

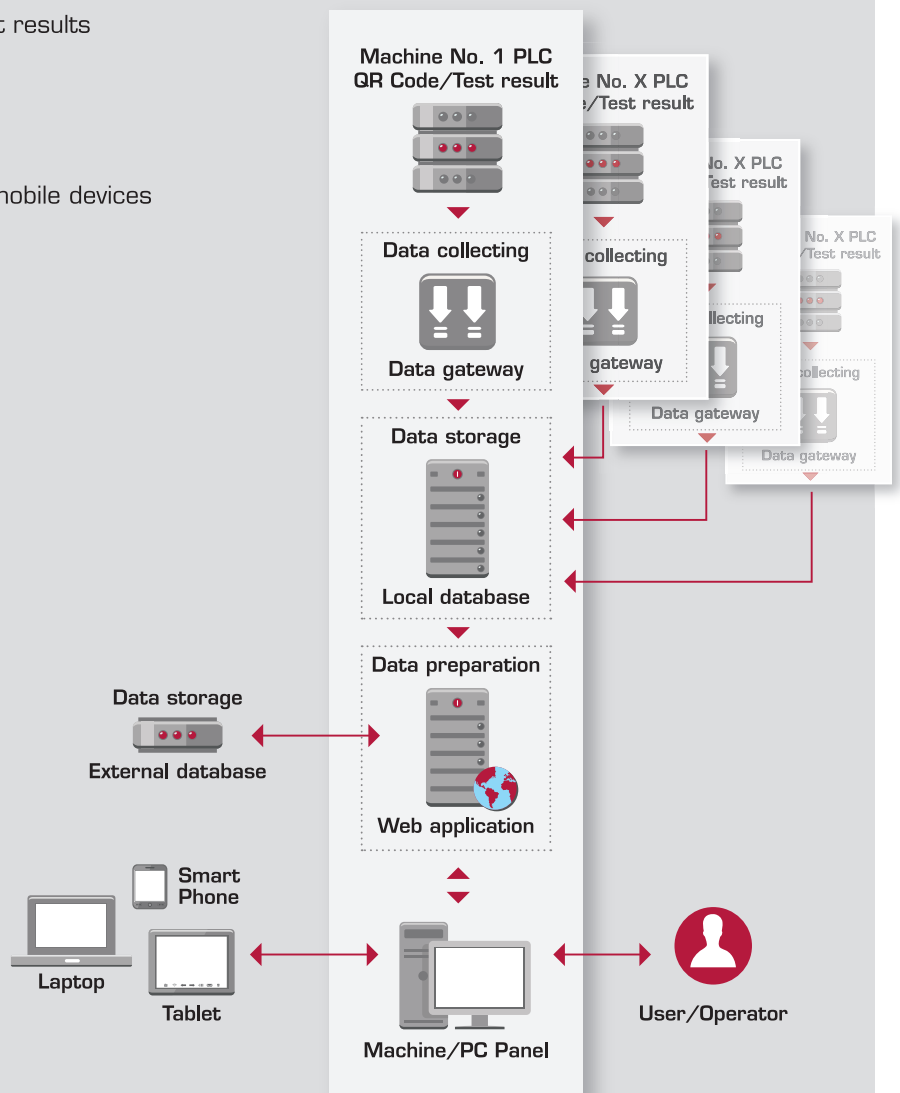

SAVE REPORTS IN

- PDF
- Excel
- Word

EXPORT REPORTS AS

- XML Format

DATA MANAGER

VALIDATE YOUR QUALITY

WAREHOUSE SOLUTION

CMWTEC is a leading manufacturer for delivery of test machine equipment for OE manufacturing. The wide range of different test machines in production lines as well as single and special applications allow our customer a 100% test result.

One of our solutions is the "Warehouse Test Machine". Combination or Single Test Machine of High Voltage Leakage Test and High Rate Discharge Test together with our Data**Manager** as a web application SQL based software this test unit can be installed all over the world with access to the test data in the headquarter.

Delivery consisting of two short conveyor for loading and unloading, Test Machine and Data**Manager** software database. Independently from the production line this unit can be used for each separate warehouse or shipping line.

CMWTEC SERVICE SUPPORT

IT'S NOT A PHRASE IT'S A COMMITMENT

With the delivery and installation of our machines we will not give up our responsibility. We place a high value on trustful and cooperative partnership. Therefore, we continue to be your first choice when it comes to finding a solution for your problem. It even goes so far that if necessary we will also come to you personally. Because with us service is not a blank promise but part of our philosophy! As a Global player CMWTEC support its customer with Service beyond the regular commissioning conditions.

- Telephone support with immediately response – to shorten the machine downtime
- Email support with trouble shooting description
- Remote access to machine PLC for small modifications
- Quick response for Spare part inquiries
- Short delivery time for critical spare parts
- Conference call – for technical solutions
- 24/7 online documentation service – for delivered machines
- Worldwide service by own service engineers
